

✓ Wrenches

A mighty wrench is the most associated tool for a plumber, but there is no single all-purpose wrench, so plumbers carry pipe wrench, basin wrench, adjustable wrench, and faucet key.

✓ Pliers

Pliers are small tools that helps to loosen and tighten nuts and bolts that are too small for a wrench to grip.

✓ Tube and Plastic Pipe Cutters

Cutters help to remove, replace, and resize copper and plastic pipes.

✓ Plumber Torch

These are small, handheld tools that allow to apply intense heat in precise areas, soldering and sealing new pipes.

✓ Plungers

Heavy-duty flange and cup plungers produce significant suction.

✓ Hand Auger

A hand auger is a circular, handheld device that allows plumbers to drive a cable deep down a drain to break apart and clear clogs.

✓ Flexible Funnel

Keep your workspace clean with a flexible funnel. These funnels are available in different sizes, so it's simple to move liquid into a drain pan.

✓ Snake Machine

A snake machine is a large, motorized version of the hand auger, where clogs are especially deep or difficult to displace.

✓ Press Fitting System

These physically press a connection onto a pipe, producing an impermeable connection or seal.

✓ Plumber Tape

Plumbers use this tape to patch or prevent possible leaks at threaded joint connections in piping. It is also known as Thread Sealing Tape.
